B	8	Skills Center: Reading	3	Literature	CCSS.ELA-Literacy.RI.7.4	Determine the meaning of words and phrases as they are used in a text, including figurative, connotative, and technical meanings; analyze the impact of a specific word choice on meaning and tone.
B	8	Skills Center: Reading	3	Literature	CCSS.ELA-Literacy.RI.8.2	Determine a central idea of a text and analyze its development over the course of the text, including its relationship to supporting ideas; provide an objective summary of the text.
B	8	Skills Center: Reading	3	Literature	CCSS.ELA-Literacy.RI.8.4	Determine the meaning of words and phrases as they are used in a text, including figurative, connotative, and technical meanings; analyze the impact of specific word choices on meaning and tone, including analogies or allusions to other texts.
B	8	Skills Center: Reading	3	Literature	CCSS.ELA-Literacy.RL.6.1	Cite textual evidence to support analysis of what the text says explicitly as well as inferences drawn from the text.
B	8	Skills Center: Reading	3	Literature	CCSS.ELA-Literacy.RL.6.2	Determine a theme or central idea of a text and how it is conveyed through particular details; provide a summary of the text distinct from personal opinions or judgments.
B	8	Skills Center: Reading	3	Literature	CCSS.ELA-Literacy.RL.6.3	Describe how a particular story's or drama's plot unfolds in a series of episodes as well as how the characters respond or change as the plot moves toward a resolution.
B	8	Skills Center: Reading	3	Literature	CCSS.ELA-Literacy.RL.6.4	Determine the meaning of words and phrases as they are used in a text, including figurative and connotative meanings; analyze the impact of a specific word choice on meaning and tone.
B	8	Skills Center: Reading	3	Literature	CCSS.ELA-Literacy.RL.6.5	Analyze how a particular sentence, chapter, scene, or stanza fits into the overall structure of a text and contributes to the development of the theme, setting, or plot.
B	8	Skills Center: Reading	3	Literature	CCSS.ELA-Literacy.RL.6.6	Explain how an author develops the point of view of the narrator or speaker in a text.
B	8	Skills Center: Reading	3	Literature	CCSS.ELA-Literacy.RL.7.1	Cite several pieces of textual evidence to support analysis of what the text says explicitly as well as inferences drawn from the text.
B	8	Skills Center: Reading	3	Literature	CCSS.ELA-Literacy.RL.7.2	Determine a theme or central idea of a text and analyze its development over the course of the text; provide an objective summary of the text.
B	8	Skills Center: Reading	3	Literature	CCSS.ELA-Literacy.RL.7.3	Analyze how particular elements of a story or drama interact (e.g., how setting shapes the characters or plot).
B	8	Skills Center: Reading	3	Literature	CCSS.ELA-Literacy.RL.7.4	Determine the meaning of words and phrases as they are used in a text, including figurative and connotative meanings; analyze the impact of rhymes and other repetitions of sounds (e.g., alliteration) on a specific verse or stanza of a poem or section of a story or drama.
B	8	Skills Center: Reading	3	Literature	CCSS.ELA-Literacy.RL.7.5	Analyze how a drama's or poem's form or structure (e.g., soliloquy, sonnet) contributes to its meaning.
B	8	Skills Center: Reading	3	Literature	CCSS.ELA-Literacy.RL.7.6	Analyze how an author develops and contrasts the points of view of different characters or narrators in a text.
B	8	Skills Center: Reading	3	Literature	CCSS.ELA-Literacy.RL.8.1	Cite the textual evidence that most strongly supports an analysis of what the text says explicitly as well as inferences drawn from the text.
B	8	Skills Center: Reading	3	Literature	CCSS.ELA-Literacy.RL.8.2	Determine a theme or central idea of a text and analyze its development over the course of the text, including its relationship to the characters, setting, and plot; provide an objective summary of the text.
B	8	Skills Center: Reading	3	Literature	CCSS.ELA-Literacy.RL.8.3	Analyze how particular lines of dialogue or incidents in a story or drama propel the action, reveal aspects of a character, or provoke a decision.
B	8	Skills Center: Reading	3	Literature	CCSS.ELA-Literacy.RL.8.4	Determine the meaning of words and phrases as they are used in a text, including figurative and connotative meanings; analyze the impact of specific word choices on meaning and tone, including analogies or allusions to other texts.

B	9	Skills Center: Speaking and Listening	3	Participating in Discussions	CCSS.ELA-Literacy.SL.9-10.1a Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.
B	9	Skills Center: Speaking and Listening	3	Participating in Discussions	CCSS.ELA-Literacy.SL.9-10.1b Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed.
B	9	Skills Center: Speaking and Listening	3	Participating in Discussions	CCSS.ELA-Literacy.SL.9-10.1c Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions.
B	9	Skills Center: Speaking and Listening	3	Participating in Discussions	CCSS.ELA-Literacy.SL.9-10.1d Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.
B	10	Skills Center: Writing	1	Writing Foundations	CCSS.ELA-Literacy.W.9-10.5 Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience.
B	10	Skills Center: Writing	2	Argument	CCSS.ELA-Literacy.W.9-10.1 Write arguments to support claims in an analysis of substantive topics or texts, using valid reasoning and relevant and sufficient evidence.
B	10	Skills Center: Writing	3	Informative and Explanatory Texts	CCSS.ELA-Literacy.W.9-10.2 Write informative/explanatory texts to examine and convey complex ideas, concepts, and information clearly and accurately through the effective selection, organization, and analysis of content.
B	10	Skills Center: Writing	4	Narrative Writing	CCSS.ELA-Literacy.W.9-10.3 Write narratives to develop real or imagined experiences or events using effective technique, well-chosen details, and well-structured event sequences.
B	10	Skills Center: Writing	5	Production and Distribution of Writing	CCSS.ELA-Literacy.W.9-10.6 Use technology, including the Internet, to produce, publish, and update individual or shared writing products, taking advantage of technology's capacity to link to other information and to display information flexibly and dynamically.

A	8	Skills Center: Reading	8	Integration of Knowledge and Ideas in Texts	CCSS.ELA-Literacy.RI.9-10.5	Analyze in detail how an author's ideas or claims are developed and refined by particular sentences, paragraphs, or larger portions of a text (e.g., a section or chapter).
A	8	Skills Center: Reading	8	Integration of Knowledge and Ideas in Texts	CCSS.ELA-Literacy.RI.9-10.6	Determine an author's point of view or purpose in a text and analyze how an author uses rhetoric to advance that point of view or purpose.
A	8	Skills Center: Reading	8	Integration of Knowledge and Ideas in Texts	CCSS.ELA-Literacy.RI.9-10.7	Analyze various accounts of a subject told in different mediums (e.g., a person's life story in both print and multimedia), determining which details are emphasized in each account.
A	8	Skills Center: Reading	8	Integration of Knowledge and Ideas in Texts	CCSS.ELA-Literacy.RI.9-10.8	Delineate and evaluate the argument and specific claims in a text, assessing whether the reasoning is valid and the evidence is relevant and sufficient; identify false statements and fallacious reasoning.
A	8	Skills Center: Reading	8	Integration of Knowledge and Ideas in Texts	CCSS.ELA-Literacy.RI.9-10.9	Analyze seminal U.S. documents of historical and literary significance (e.g., Washington's Farewell Address, the Gettysburg Address, Roosevelt's Four Freedoms speech, King's "Letter from Birmingham Jail"), including how they address related themes and concepts.
A	8	Skills Center: Reading	8	Integration of Knowledge and Ideas in Texts	CCSS.ELA-Literacy.RL.9-10.7	Analyze the representation of a subject or a key scene in two different artistic mediums, including what is emphasized or absent in each treatment (e.g., Auden's "Musée des Beaux Arts" and Breughel's Landscape with the Fall of Icarus).
A	8	Skills Center: Reading	8	Integration of Knowledge and Ideas in Texts	CCSS.ELA-Literacy.RL.9-10.9	Analyze how an author draws on and transforms source material in a specific work (e.g., how Shakespeare treats a theme or topic from Ovid or the Bible or how a later author draws on a play by Shakespeare).
A	8	Skills Center: Reading	8	Integration of Knowledge and Ideas in Texts	CCSS.ELA-Literacy.SL.9-10.3	Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.
A	8	Skills Center: Reading	8	Integration of Knowledge and Ideas in Texts	CCSS.ELA-Literacy.W.9-10.9a	Draw evidence from literary or informational texts to support analysis, reflection, and research. Apply grades 9–10 Reading standards to literature (e.g., "Analyze how an author draws on and transforms source material in a specific work [e.g., how Shakespeare treats a theme or topic from Ovid or the Bible or how a later author draws on a play by Shakespeare]").
A	9	Skills Center: Speaking and Listening	1	Presenting	CCSS.ELA-Literacy.SL.9-10.2	Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.

Attachment 28 - ACAD						
A	9	Skills Center: Speaking and Listening	1	Presenting	CCSS.ELA-Literacy.SL.9-10.4	Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.
A	9	Skills Center: Speaking and Listening	1	Presenting	CCSS.ELA-Literacy.SL.9-10.5	Make strategic use of digital media (e.g., textual, graphical, audio, visual, and interactive elements) in presentations to enhance understanding of findings, reasoning, and evidence and to add interest.
A	9	Skills Center: Speaking and Listening	1	Presenting	CCSS.ELA-Literacy.SL.9-10.6	Adapt speech to a variety of contexts and tasks, demonstrating command of formal English when indicated or appropriate.
A	9	Skills Center: Speaking and Listening	1	Presenting	CCSS.ELA-Literacy.W.9-10.5	Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience.
A	9	Skills Center: Speaking and Listening	1	Presenting	CCSS.ELA-Literacy.W.9-10.8	Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess the usefulness of each source in answering the research question; integrate information into the text selectively to maintain the flow of ideas, avoiding plagiarism and following a standard format for citation.
A	9	Skills Center: Speaking and Listening	2	Listening	CCSS.ELA-Literacy.SL.9-10.3	Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.
A	9	Skills Center: Speaking and Listening	3	Participating in Discussions	CCSS.ELA-Literacy.SL.9-10.1	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.
A	9	Skills Center: Speaking and Listening	3	Participating in Discussions	CCSS.ELA-Literacy.SL.9-10.1a	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.
A	9	Skills Center: Speaking and Listening	3	Participating in Discussions	CCSS.ELA-Literacy.SL.9-10.1b	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed.
A	9	Skills Center: Speaking and Listening	3	Participating in Discussions	CCSS.ELA-Literacy.SL.9-10.1c	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions.

A	12	Skills Center: Reading	7	Craft and Structure: Informational Texts	CCSS.ELA-Literacy.RI.9-10.5	Analyze in detail how an author's ideas or claims are developed and refined by particular sentences, paragraphs, or larger portions of a text (e.g., a section or chapter).
A	12	Skills Center: Reading	7	Craft and Structure: Informational Texts	CCSS.ELA-Literacy.RI.9-10.7	Analyze various accounts of a subject told in different mediums (e.g., a person's life story in both print and multimedia), determining which details are emphasized in each account.
A	12	Skills Center: Reading	7	Craft and Structure: Informational Texts	CCSS.ELA-Literacy.RI.9-10.6	Determine an author's point of view or purpose in a text and analyze how an author uses rhetoric to advance that point of view or purpose.
A	12	Skills Center: Reading	7	Craft and Structure: Informational Texts	CCSS.ELA-Literacy.RI.9-10.10	By the end of grade 9, read and comprehend literary nonfiction in the grades 9–10 text complexity band proficiently, with scaffolding as needed at the high end of the range. By the end of grade 10, read and comprehend literary nonfiction at the high end of the grades 9–10 text complexity band independently and proficiently.
A	12	Skills Center: Reading	7	Craft and Structure: Informational Texts	CCSS.ELA-Literacy.SL.9-10.3	Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.
A	12	Skills Center: Reading	7	Craft and Structure: Informational Texts	CCSS.ELA-Literacy.RI.9-10.4	Determine the meaning of words and phrases as they are used in a text, including figurative, connotative, and technical meanings; analyze the cumulative impact of specific word choices on meaning and tone (e.g., how the language of a court opinion differs from that of a newspaper).
A	12	Skills Center: Reading	7	Craft and Structure: Informational Texts	CCSS.ELA-Literacy.RI.9-10.2	Determine a central idea of a text and analyze its development over the course of the text, including how it emerges and is shaped and refined by specific details; provide an objective summary of the text.
A	12	Skills Center: Reading	8	Integration of Knowledge and Ideas in Texts	CCSS.ELA-Literacy.RI.9-10.7	Analyze various accounts of a subject told in different mediums (e.g., a person's life story in both print and multimedia), determining which details are emphasized in each account.
A	12	Skills Center: Reading	8	Integration of Knowledge and Ideas in Texts	CCSS.ELA-Literacy.RL.9-10.7	Analyze the representation of a subject or a key scene in two different artistic mediums, including what is emphasized or absent in each treatment (e.g., Auden's "Musée des Beaux Arts" and Breughel's Landscape with the Fall of Icarus).
A	12	Skills Center: Reading	8	Integration of Knowledge and Ideas in Texts	CCSS.ELA-Literacy.RI.9-10.6	Determine an author's point of view or purpose in a text and analyze how an author uses rhetoric to advance that point of view or purpose.
A	12	Skills Center: Reading	8	Integration of Knowledge and Ideas in Texts	CCSS.ELA-Literacy.RI.9-10.8	Delineate and evaluate the argument and specific claims in a text, assessing whether the reasoning is valid and the evidence is relevant and sufficient; identify false statements and fallacious reasoning.
A	12	Skills Center: Reading	8	Integration of Knowledge and Ideas in Texts	CCSS.ELA-Literacy.RI.9-10.5	Analyze in detail how an author's ideas or claims are developed and refined by particular sentences, paragraphs, or larger portions of a text (e.g., a section or chapter).
A	12	Skills Center: Reading	8	Integration of Knowledge and Ideas in Texts	CCSS.ELA-Literacy.SL.9-10.3	Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.
A	12	Skills Center: Reading	8	Integration of Knowledge and Ideas in Texts	CCSS.ELA-Literacy.W.9-10.7	Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.
A	12	Skills Center: Reading	8	Integration of Knowledge and Ideas in Texts	CCSS.ELA-Literacy.RI.9-10.9	Analyze seminal U.S. documents of historical and literary significance (e.g., Washington's Farewell Address, the Gettysburg Address, Roosevelt's Four Freedoms speech, King's "Letter from Birmingham Jail"), including how they address related themes and concerns.

Grade Band K-3	Social Studies K ED	Students begin by locating themselves and their families within a community and culture. They learn about basic physical geography and how to read maps and globes. Students explore what history is and how they study the past. They learn about the first peoples of the Americas and the founding of the United States. Students identify symbols of and celebrations in the United States and investigate the lives of significant historical figures in the context of civic responsibility. They also explore citizenship and basic economics.
	Social Studies 1 ED	Students learn about the locations, characteristics, resources, and cultures of the earth, as well as those in their own community. They explore concepts related to the study of history and the history of the United States. Students identify key U.S. symbols and learn the reasons behind special national observances. They learn the meaning of citizenship and the duties and responsibilities of good citizens. Students explore basic economic concepts, such as needs and wants, buying and selling, and consumers and producers. They investigate the development of ancient civilizations in the Fertile Crescent, Egypt, India, China, and Greece.
	Social Studies 2 ED	Second graders investigate six social studies components in the course. The components covered in these units include map skills, geography, history, culture, economics, and civics. Within each unit, students explore various elements giving them a broad introduction to social studies knowledge and providing a base for future learning. Students learn mapping skills including parts, types, reading, and creating maps. An easy transition into geography follows, where students put their map skills to use exploring the features of communities, states, the country, and the world. In discovering the meaning of history, students investigate using sources to learn more about themselves and their communities. They also explore the lives of people who influenced history as leaders, inventors, and trailblazers. In the next unit students are off on an adventure to discover cultures around the world and in their own communities. In the remaining two units of the course, students learn the basic parts and operations of an economy and government.
	Social Studies 3 ED	In this course, third graders practice important social studies skills while learning about the United States. They begin by discovering ways that maps can help us better understand the impact of geography on people and settlements over time. A tour across the United States highlights different features and landmarks across the nation. Then, a study of cultures, including worldwide and on a community level, helps students understand the American identity and how groups change over time. Focusing on American government the course introduces important concepts such as founding documents, federalism, and the functions of government at each level. A discussion of the importance of voting transitions to the next unit where students consider the meaning of citizenship and how people uphold their civic duties. Next, after studying the relationship between humans and the environment, students identify a public issue and complete a research-based report encouraging change. The final units introduce basic economic concepts concerning the American economy and important concepts of money and personal finance to help guide future economic decision-making.

Attachment 28 - AGAD

Grade Band 4-5	American Studies 4 ED	<p>Fourth graders investigate eight essential United States social studies in this course. After learning how to read different types of maps, students will use maps to explore America's regions and natural resources. They will embark on a tour across the nation, learning about the lives of Americans today and the many places to visit. A look at the nation's history begins with pre-Columbian societies and the conflicts arising from the arrival of Europeans. Students will learn about the growth of the new nation, practice interpreting primary sources, and consider the importance of fighting in world wars abroad and for civil rights at home. By exploring various cultural and ethnic traditions, students will better understand the people of North America, how they have interacted with the environment, and how they have changed over time. Completing a state research project will allow students to strengthen their research and analysis skills. Sharing their work will help improve their presentation skills. Then, a unit on economics addresses basic economic concepts, financial choices, taxes, banking, and investing. The final unit looks at government at the federal, state, and local levels. Students learn about citizenship, our country's founding documents, and issues facing the nation today.</p>
	Hawaii State History	<p>Students will experience customized lessons that bring to life the history of the state of Hawaii.</p> <p><i>*Note: The Scope and Sequence document will be produced for this grade level when the custom course is complete.</i></p>
	Modern American History 5 E1	<p>Students in Modern American History ED explore United States history, geography, economics, and government. This is done by focusing on the influence of physical and cultural characteristics on national growth and development. Students study the economic growth of the 1800s, westward expansion, the Civil War, Progressive era reforms, the course of the two world wars, Great Depression, challenges of the Cold War, achievements in civil rights, leading to events and changes in the modern era. The course emphasizes critical thinking skills, including questioning, examining fact and opinion, analyzing and evaluating sources of information, contrasting and comparing using primary and secondary sources, and conducting research using a variety of resources. Additional social studies skills are integrated in the lessons including reading and analyzing maps, creating and interpreting charts and graphs, identifying relationships, writing persuasively, and developing thinking and independent study skills.</p>

Grade Band 6-8	World History I	<p style="text-align: center;">Attachment 28 - ACAD</p> <p>K12's World History course surveys the story of the human past from the period before written records, prehistory, through the fourteenth century. The course is organized chronologically and, within broad eras, regionally. The course focus is the story of the human past and change over time, including the development of religion, philosophy, the arts, and science and technology. Geography concepts and skills are introduced as they appear in the context of the historical narrative. Students explore what archaeologists and historians have learned about the earliest hunter-gatherers and farmers, and then move to a study of the four river valley civilizations. After a brief writing unit, they study the origins of Confucianism, Hinduism, Buddhism, and Judaism and the eras in which they developed. The second half of the course traces the story of classical Greece and Rome, the Byzantine Empire, the origins of Christianity and Islam, and then continues through the fourteenth century in Europe, North Africa, and East Asia. Historical thinking skills are a key component of Intermediate World History. Students practice document and art analysis, conduct research, and write in a variety of formats. They also practice map reading skills and look at how historians draw conclusions about the past as well as what those conclusions are.</p>
	History of the Hawaiian Kingdom and Pacific Island Studies	<p>Students will experience customized lessons that bring to life the history of the Hawaiian Kingdom and Pacific Islands.</p> <p><i>*Note: The Scope and Sequence document will be produced for this grade level when the custom course is complete.</i></p>
	Summit American History to the Late 1800s	<p>In Summit American History to the Late 1800s, students study major historical events and people from colonization through the Reconstruction period. This includes a study of Colonial America, the Revolutionary War, the drafting of the Constitution, the growth of the United States, the Civil War, and Reconstruction.</p> <p>In addition, the course contains two flex units of lessons that can be used as part of the main course to address local standards. One of these units focuses on the history and cultures of Native Americans, as well as other indigenous peoples and their descendants, who have contributed to the history of the United States. The second flex unit covers the major historical events and people from post-Reconstruction to the beginning of the twentieth century.</p> <p>Throughout the course, students practice critical analysis skills as they read primary sources and study historical accounts from a variety of perspectives. They expand their knowledge of the world around them by studying how geography has influenced American history. By analyzing related current events, students see how the events of yesterday affect the world around them today. Students also reflect on changes and continuities within and between time periods. Students demonstrate their knowledge through a mixture of projects, discussions, tests, and independent work.</p>

Grade Band 9-12	World History	In this comprehensive survey of world history from prehistoric to modern times, students focus in depth on the developments and events that have shaped civilization across time. The course is organized chronologically and, within broad eras, regionally. Lessons address developments in religion, philosophy, the arts, science and technology, and political history. The course also introduces geography concepts and skills within the context of the historical narrative. Online lessons and assessments complement the textbook, World History: Our Human Story. Students are challenged to consider topics in depth as they analyze primary sources and maps, create timelines, and complete other projects—practicing historical thinking and writing skills as they explore the broad themes and big ideas of human history.
	US History	This course is a full-year survey that provides students with a comprehensive view of American history from the first migrations of nomadic people to North America to recent events. Readings are drawn from The American Odyssey: A History of the United States. Online lessons help students organize their study, explore topics in depth, review in preparation for assessments, and practice skills of historical thinking and analysis. Activities include analyzing primary sources and maps, creating time lines, completing projects and written assignments, and conducting independent research.
	Modern History of Hawaii	Students will experience customized lessons that bring to life the modern history of Hawaii. <i>*Note: The Scope and Sequence document will be produced for this grade level when the custom course is complete.</i>
	US Government and Politics	This course studies the history, organization, and functions of the United States government. Beginning with the Declaration of Independence and continuing through to the present day, students explore the relationship between individual Americans and our governing bodies. Students take a close look at the political culture of our country, and gain insight into the challenges faced by citizens, elected government officials, political activists, and others. Students also learn about the roles of political parties, interest groups, the media, and the Supreme Court. They discuss their own views on current political issues.

29. Explain how the instructional methodology of your proposed model aligns with your mission across all proposed grade levels

Our mission is to provide a K through 12 world class, adaptive, synchronous and asynchronous virtual learning environment powered to meet the needs and interests of students across Hawai'i wherever they are academically, physically, socially, and/or culturally and to prepare them for success in their chosen college or career path, in alignment with their individual kuleana. Our goal is to successfully accomplish our mission across all grade levels demonstrating that, based on the Academic Performance Framework, our mission is ingrained in our education program; guides decision-making and priority setting; and is reflected in student learning and progress.

Our K-12 grade virtual school will immerse students, starting in kindergarten, in experiential learning linked to Career Readiness. The School's curriculum aligns with Hawai'i Subject Matter Standards for grades K-12. It will provide a project-based and collaborative environment with virtual and hands-on experiences for students at every developmental stage. LNCA will meet all the standards and requirements put forth by the Hawai'i State Department of Education for a student to obtain a high school diploma.

The Applicant Governing Board of LNCA believes that high school should no longer be a choice between college or career but preparation for both. The CCR approach, discussed earlier in this application, is more comprehensive than the vocational training of the past and much broader than what is traditionally referred to as Career Technical Education (CTE):

- Students complete core academic subjects alongside applied learning experiences that provide the skills needed to thrive in high-growth industries in both virtual and blended settings.
- Coursework is combined with real-world experience working with industry partners in internships or project-based learning opportunities.
- Students learn in the same environment that today's professionals experience. The environment is rich with professional skills development, virtual interaction, and problem-solving and networking opportunities.
- Graduates enter the next phase of their lives with more than just a diploma, whether they are off to college, entering the workforce – or both.

LNCA's career readiness program will help ensure students enter their post-high school period with a plan that is both informed and well-formed, where going to college can be the right choice, but not the only choice. The School's students can participate in real-world learning experiences, like in-person and virtual internships, externships (short, practical experiences provided by employers), summer jobs, and apprenticeships, that allow them to apply the technical skills they learned in school and develop professional skills like teamwork and critical thinking that drive long-term career success. Most real-world experiences will take place during our students' junior and senior years or during summer breaks. Industry partnerships will be built by dedicated staff members and members of an industry Advisory Council. Counselors will be charged with working with and matching students to real-world learning opportunities.

Attachment 29 - ACAD

The traditional education environment mirrors the work experiences of the past, while the CCR environment creates the new work environment today's students will enter after they graduate.

The curriculum is designed to meet all of Hawai'i's state standards and requirements. It will provide a project-based and collaborative environment with virtual and hands-on experiences for students at every developmental stage.

The Applicant Governing Board believes that the ability to participate in authentic, meaningful career and college preparation opportunities and to earn college credit and/or an industry certification while still in high school is likely to encourage students to persist with their education at LNCA. We plan to provide challenging college-level experiences through dual credit course offerings to our students in all geographic areas where they reside including opportunities for students to physically attend postsecondary institutions.

Hawai'i continues to experience a declining population including a shrinking labor pool according to Hawai'i's Chief State Economist Eugene Tian. Dr. Tian commented on the U.S. Census Bureau's Vintage 2022 National and state population estimates¹ released in March 2023: "We already have a labor shortage, and it will be more difficult for businesses to find the workers they want." This is an existential threat to the state and presents a huge opportunity to ensure our youth can survive and thrive in Hawai'i. Initiatives like [Promising Credentials \(https://hawaiicareerpathways.org/resources/work-based-learning/career-exploration/promising-credentials/\)](https://hawaiicareerpathways.org/resources/work-based-learning/career-exploration/promising-credentials/) show that there is a big need for schools to be thoughtful and intentional about how their career readiness programs can best set students up for success in our local economy, with a particular focus on high-demand and high-wage opportunities. It is estimated that more than 80% of good jobs today require a post-secondary credential, including industry-recognized credentials. Yet, national data shows only 18% of credentials earned by K-12 students in the US hold real value to employers. In HIDOE schools, we've seen a steady increase (<https://www.hawaiipublicschools.org/VisionForSuccess/AdvancingEducation/StrategicPlan/Pages/SPDR-1.aspx>) of career and technical education (CTE) concentrators, but we haven't seen much of a parallel increase in foundational academic proficiency in math, science, or reading. That indicates that there might be a disconnect in CTE programs with how they connect to this foundational knowledge.

In his State of the State Address on January 24, 2022, Governor David Ige focused on the critical need for virtual education and how the State is working to meet this critical need saying:

- *We've long talked about distance learning—but more as an alternative to the traditional classroom. The pandemic made us realize that we could use virtual classrooms to ensure that every student has every opportunity to learn no matter where they live.*
- *We dedicated \$5 million for UH to launch a Hawai'i Online Portal for Education, which is developing curriculum for distance learning and additional training for teachers. The projects include everything from STEM education to agriculture. One of these projects is Ka'u Dream, a place-based, community-focused education initiative on Hawai'i island.*

Attachment 29 - ACAD

Educators and the community have worked together to align the curriculum to career and business opportunities in Ka'u. They created enhanced learning activities that will engage and inspire students beyond graduation. This community-led initiative is a model for building thriving communities across the state.

The traditional way most schools educate our youth has not changed. The Applicant Governing Board is focused on meeting the critical career education needs of the State's students that the Governor pointed out in his State of the State Address. LNCA will be an innovator and a catalyst for educational change in Hawai'i.

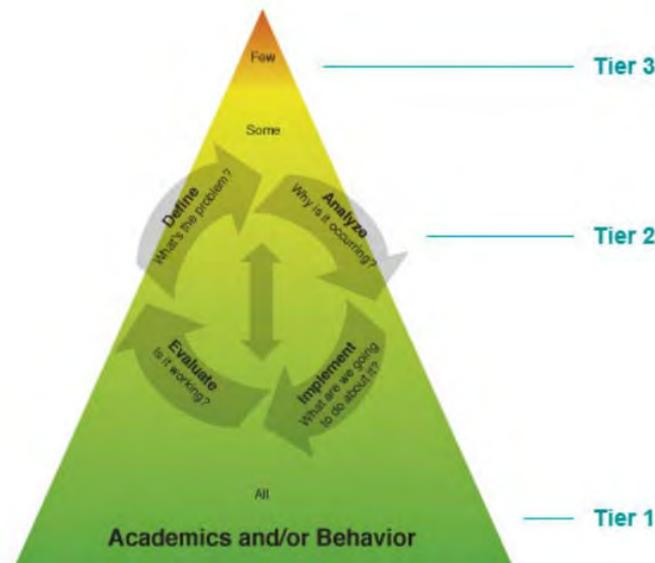

Attachment 30 - ACAD

30. Explain how will you accommodate the (differentiated) needs of all students, such as English Learners, Students with Disabilities (SWD), at-risk students, and students who are far below or above grade level, and the targeted student population?

Below/Above Grade Level, At-Risk, and Targeted Student Population

LNCA understands that each student is unique and learns differently, and that effective instruction encompasses Universal Design approaches. LNCA will implement a Multi-Tier System of Support (MTSS), a multi-tiered research-based approach for early identification and support of students' learning and behavioral needs that is aligned with the School's instructional program (see **Attachment 11 - EIS**). Through the implementation of a tiered system of instruction and intervention, teachers implement teaching strategies and work proactively to design lessons to meet all learner needs through differentiated strategies. Through the implementation of a Universal Screener Tool, students' academic strengths and weaknesses are identified before the beginning of the school year or after enrollment approval.

MTSS Pyramid of Support

Using a multi-tiered approach to efficiently differentiate instruction for all students, LNCA will create systems and procedures for continual data analysis, regular data conferences, and ongoing teacher training. Struggling learners at Tiers I, II, and III will be provided with interventions at increasing levels of intensity to accelerate their rate of learning. Examples of identified research-based intervention programs available for teachers to assign students within the learning platform:

- MindPlay: evidence-based, fully adaptive reading intervention tool for K-12 students. Students work in the intervention for 30 minutes daily.
- Skills Arcade: a supplemental tool for differentiated learning for K-8 students in math, language arts, reading, and science.

Attachment 30 - ACAD

Data analysis will be used to inform and evaluate each student and their unique learning needs regardless of tiered level. Through the implementation of regular data conferences, students will be identified proactively as at-risk, on-track, or advanced students. Students identified as at-risk or advanced will have measurable action steps developed in response to the data analysis; action steps will include SMART goals, instructional strategies, and a system for follow-up to monitor progress on each of the identified individual students. Decisions about the intensity and duration of interventions will be based on individual student responses to instruction. These services will be provided by a variety of personnel, including general education teachers, special education teachers, and specialists.

LNCA will have defined tiered system procedures that will be aligned with Hawai'i State requirements. In addition to regularly occurring data team meetings, tiered team members will conduct a deeper data dive on those students identified in Tier II or Tier III. Depending on the type of identified need, academic and/or behavioral, needs can be addressed through intervention support and data collection to validate each student's response to instruction. Tiered teams are composed of a diverse background of stakeholders, often including a grade-level administrator, math teacher, English teacher, and other content area staff.

Students identified as the most at-risk or students that need additional enrichment are ranked using universal screener data, state assessment data, and teacher recommendations. Tier II supports are created based on individual student needs, with a focus on small group, differentiated sessions to address each identified student need. Interim assessments are utilized to continuously drive instruction and to adjust interventions based on student data and response to instruction. Students that need more intensive support are supported in Tier III. Tier III students receive individualized targeted instruction in one-on-one or small group settings.

The K12 online curriculum makes real-time and continuous student data review seamless. Since student progress towards each lesson is recorded and tracked instantly within the online dashboard, teachers and tiered teams are able to analyze and pinpoint specific academic needs of each student. K12 courses provide students with diagnostic assessments throughout the school year that allow the School to track student growth in each subject and proactively target specific areas of need. In addition to diagnostic assessments, courses have built-in formative assessments throughout each course for continual progress monitoring and student data to drive instruction.

Students with Disabilities

As a public charter school, LNCA would welcome the opportunity to serve students with disabilities, students who often find virtual education to be the modality in which they thrive and succeed. The founders believe strongly that all students have strengths and needs that must be recognized, nurtured, and accommodated to reach their full potential as contributing members of society.

Attachment 30 - ACAD

Working with K12, an experienced provider of special education and related services, LNCA will focus on meeting the needs of any enrolled students with an IEP or 504 Plan and ensuring that we are providing directly or arranging for the services called for in the plan. LNCA will also offer necessary accommodations by procuring the technology and other services required in the student's plan to aid students in navigating through their courses. Further, K12's experience making web-based content more accessible to students with disabilities includes incorporating audio and video enhancements into the courses and using equivalent alternatives to accommodate various disabilities, such as using text equivalents and various forms of assistive technology. All materials meet the requirements of the National Instructional Materials Accessibility Standards (NIMAS).

Special Education Services and Support

All identified students with a disability will have an IEP meeting upon enrollment with the appropriate team members in attendance. The IEP will include a statement of the student's current level of academic and functional performance and how the student's disability affects his/her ability to progress through the general education curriculum; a statement of measurable goals; and a statement of educational services, program modification(s), and support necessary for the student to be involved in the general education coursework within the new virtual learning environment, including assistive technology. The means for learning and demonstrating proficiency will be aligned with the LNCA performance standards. Assessment accommodations or alternative instruction procedures will be based on the objectives in the student's IEP.

If a student has a behavioral need, the School's staff will conduct a Functional Behavioral Assessment (FBA) and create a Behavioral Intervention Plan (BIP) as appropriate. The IEP team will consider strategies including positive behavioral interventions and support to address behavioral needs through the IEP process.

Students with disabilities will be supported by their general education teacher in the least restrictive environment, in addition to receiving the supportive services of a special education teacher. The student's IEP will determine the type and amount of services necessary to meet the goals of the IEP. Related service providers, if required, will be located within the geographical vicinity of the student or services will be provided virtually if appropriate.

LNCA believes that the IEP is a working document that is to be amended to reflect the student's current academic and functional performance. The IEP will be reviewed at a minimum of once per year and upon evaluation/re-evaluation.

Students with disabilities will participate in the general education program to the greatest extent possible offered by LNCA and as determined by the IEP team. The School's special education teachers will support students with disabilities and provide specially designed instruction through synchronous and asynchronous contact which may include phone conferencing, email, and direct "real-time" interaction through web conferencing tools. With web conferencing, the special education teacher/general education teacher can provide real-

Attachment 30 - ACAD

time support to the student and assessment of progress towards IEP goals. In addition, parent education can be effectively delivered using web conferencing.

Students with disabilities will fully participate in all general education classroom activities with their classmates including outings and field trips. If necessary, transportation will be provided to accommodate the special needs of the student as determined by the IEP team. LNCA will ensure that each student with a disability is placed in the least restrictive environment. Due to the ability of the student to access the general education web-based curriculum at any time, the student receiving special education services or programs within the general education classroom will not miss any general education instruction. Possible exceptions to this would be related services at a provider's office or students who may be better served through a functional or life skills curriculum outside of the general education classroom.

Transition services and supports will be identified for students at age 14 within their IEP. LNCA is committed to all students being prepared for their post-secondary years and students with an IEP will have the same career readiness opportunities as their peers with the appropriate supports in place as identified by the IEP team.

The full continuum of services for students in special education will be identified according to the service time and Least Restrictive Environment identified in the student's IEP. In the circumstance where a student has an intellectual disability and is working on extended evidence outcomes, an alternative curriculum will be provided, along with daily direct instruction from a special education teacher. For a demonstration of a continuum of services for students who are significantly impacted see this Special Education Self-Contained Math Class about angles.

<https://screenpal.com/watch/c0nDrYVylGh>

Based on K12's experience serving over 24,200 students with disabilities in compliance with IDEA, Section 504, and related state statutes and regulations in 30 states as of December 2022, LNCA anticipates that the School will have the ability to provide special education services across all disability categories including autism spectrum disorder, deaf, deaf-blindness, developmental delay, emotional disability, hard of hearing, intellectual disability, multiple disabilities, orthopedic disability, specific learning disability, speech or language disability, traumatic brain injury, and visual disability including blindness.

Related Services

Special services required in a student's IEP (examples listed below) will either be provided by a licensed therapist or individual employed by or contracted by LNCA, ensuring that appropriate licensure and background checks are completed. Therapy may be delivered in the home, virtually, or face-to-face. Face-to-face services are provided at a neutral location as agreed upon by the family and therapist. If needed, transportation will be arranged by the school for the student to attend face-to-face services.

- Orientation and mobility training
- Assistive technology evaluations

Attachment 30 - ACAD

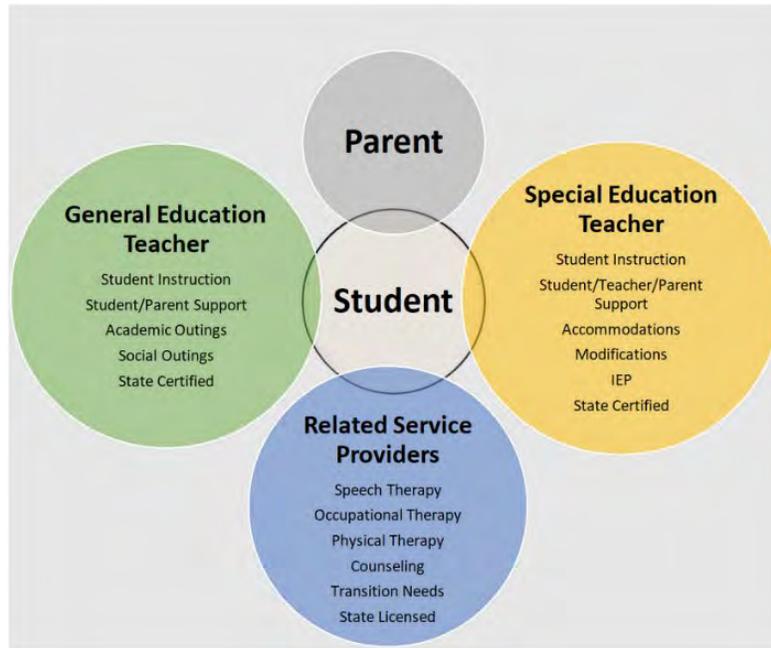

- Counseling services
- Psychological services
- Speech and language services
- Occupational therapy
- Physical therapy
- Transportation (when required)
- Interpreter services for the deaf or hard of hearing

The K12 Related Services Team, which has an extensive network of qualified related providers, will provide support to LNCA upon request by locating therapists, tracking service delivery, provider contract management, therapist credential tracking, invoice verification, and developing effective processes surrounding the provision of related services to eligible students. The main goal of the K12 Related Services Team is to ensure that students are receiving their therapy services as assigned and that the School is compliant with the provision of these services.

LNCA's Special Education/Programs Academic Administrator/Student Services Coordinator has the ability to monitor all aspects of related service delivery through the K12 Related Service Manager (RSM), a K12 proprietary online database. This system allows for the tracking of service delivery, therapist credentials, contracts, invoicing, and reporting. Reports are available from this system that allow the school to see how many students receive services, what types of service, how many sessions were delivered, how many sessions are still owed, the total cost of each service by student and therapist, and the timeframe of service delivery. Logins are controlled and allow access to assigned students at the school, teacher, provider, and therapist levels.

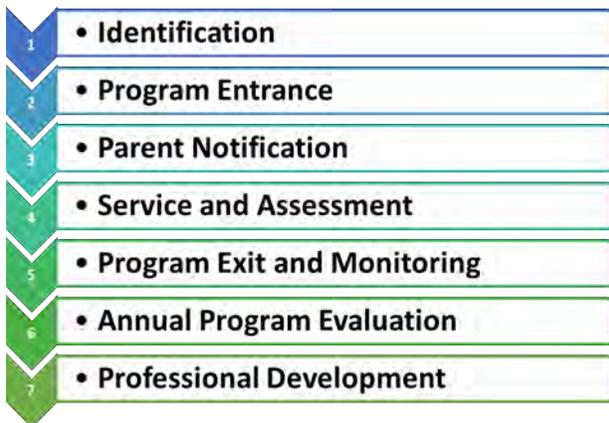

LNCA believes that it takes a complete team of individuals to serve a student with a disability to ensure academic success. As such, frequent and relevant synchronous and asynchronous communication between all parties is delivered through phone conferencing, notes, emails, and web conferencing tools. The following illustration depicts this team model.

Attachment 30 - ACAD

English Learners

LNCA will serve English Learners through a comprehensive program, including the following components:

LNCA will first identify potential English Learner (EL) students, students whose primary language is not English, during the enrollment and Child Find process. All eligible families will answer a series of online questions as a first effort of Child Find including the Home Language Survey (HLS) questions. The HLS is the first and primary effort to collect required native/primary language information about the student and/or family. Children and families with limited English proficiency will be provided translation and interpretation services to the extent needed to help the family understand the enrollment process and enroll the student in school in compliance with the Civil Rights Act of 1964, Title VI, 42 U.S.C. § 2000d et seq. and the Equal Education Opportunity Act, 20 U.S.C. § 1703. All relevant staff will be provided professional development on EL indicators and their obligation in routing positive responses to the

Attachment 30 - ACAD

appropriate English Learner (EL) point of contact. Additionally, school records will be requested from any student that was previously enrolled in a school within the United States and will be reviewed for EL indicators. Those students with positive responses to any of the HLS questions will be referred to the EL point of contact. The EL contact will talk with the family to determine if EL services were previously received, identify the current language needs of the student, and review prior school records, including any previous EL evaluations, program plans, etc. that could help the school determine the next steps. If deemed appropriate based on positive responses to the HLS questions, steps will be taken to screen and then assess the student to determine eligibility status and develop an appropriate English Learning Plan.

A Parent/Guardian Notification Letter in both English and the language of the family is used to notify parents of students that have been identified as EL and their student's placement in a language instruction program. The parent notification letter is sent each year to all identified EL students' parents and specifies the reason for identification of their child as EL and the need for placement in a language instruction program; the child's level of English proficiency; how it was assessed; the status of the child's academic achievement; the methods of instruction that will be used and the program in which the child will be placed; how the program will meet their child's educational strengths and needs; how the program will help their child learn English and meet age-appropriate academic achievement standards for grade promotion and graduation; specific exit requirements for the program; and if the child has a disability, how such a program meets the objectives of the individualized education program of the child. Also, parents are notified that they have the right to decline to enroll their child in such programs or to choose another program or method of instruction.

Once students are identified as EL students, LNCA will increase the English proficiency and academic achievement of EL students by providing high-quality language instructional programs that are evidence-based. The school will employ an appropriately licensed EL or bilingual teacher, as defined by the Hawai'i Department of Education (HIDOE) regulations, for the EL-identified students. The EL teacher can provide support to the students within the school by relating background information and experiences to the students to better grasp a concept; scaffolding instruction to aid the students in comprehension; adjusting speech or content; and providing project-based learning experiences, necessary visuals, and in-classroom modeling of best instructional practices for the general education teachers. EL teachers also provide support through ongoing collaboration with General Education teachers. An annual language proficiency assessment will be administered to all active EL students to monitor individual student language growth and overall program effectiveness. Exit criteria for EL students and monitoring of students after EL program exit will be consistent with HIDOE and federal requirements.

Advanced Learner Program

LNCA will offer an Advanced Learner Program (ALP) for all eligible students and those identified as intellectually gifted. The purpose of this program is to increase overall quality and options for advanced learners through the development of consistent procedures and offerings. The benefits of the ALP will be measured by program satisfaction ratings and retention data about

Attachment 30 - ACAD

identified advanced learners. LNCA and K12 will partner to provide advanced learners and their teachers with options for differentiating instruction through School-level instructional offerings and national enrichment offerings.

At the School level, students will have options for differentiated instruction through individual and small group activities using targeted instruction, and flexible progression strategies including acceleration, and extension activities. Students will have opportunities to complete Project Based Learning assignments within their curriculum as well as integrate their interests in the community for leadership opportunities.

Students will be identified as intellectually gifted and/or selected by their teachers to participate in the ALP program either as enrichable or advanced students having characteristics such as advanced academic skills, independent motivation, curiosity, problem-solving, and keen observing and questioning.

High school students in the ALP program will be provided opportunities to participate in Honors and Advanced Placement courses.

- K12 Honors courses hold students to a high degree of accountability and demand independence and self-discipline. Students synthesize and evaluate information and concepts from multiple sources and read texts typically assigned in college-level courses. Students also demonstrate college-level writing in essays that require analysis of primary and secondary sources, responsible use of evidence, and comprehensive citation of sources.
- K12 AP® courses are college-level courses that follow a curriculum approved by the College Board. These courses are designed to prepare students for success on AP Exams, providing students the opportunity to earn credit at most of the nation's colleges and universities. eK12 AP courses include a companion AP Exam Review course that provides practice for multiple choice exams and essay writing as well as provides students with an individualized study plan based on their results.

Section 504

Using the Child Find strategy described in response to question 55 (see **Attachment 33-55 – VBL**), LNCA will first identify students with an active Section 504 referral, or those students in need of a new Section 504 referral as part of the enrollment process. When the decision is made to initiate a Section 504 referral, the parent(s) (or guardian(s), if applicable) will be notified. When a student is identified after enrollment, a Section 504 Referral Form will be completed by the student's teacher(s) with input from others who work with the student, including the parent. The Section 504 evaluation will accurately and completely assess the nature and extent of the disability and the impact of the disability on a specific major life activity. This includes ensuring that the evaluation methods and materials are (a) in the native

Attachment 30 - ACAD

language of the student; (b) nondiscriminatory; and (c) empirically appropriate to test for the suspected disabilities.

If the Child Find committee determines that a student is disabled as defined by Section 504, the committee will determine what services or accommodations are required to enable the student to receive appropriate education and to provide the student with an equal opportunity.

McKinney-Vento Act (Homeless Education)

LNCA will identify and support students experiencing homelessness. LNCA will designate a member of the School staff as a liaison (e.g., a counselor, social worker, or Operations Team member) to ensure students eligible under the McKinney-Vento Act receive appropriate support and have every opportunity to succeed academically. During the school registration process, families may inform the school of their student's living situation. The School will ensure immediate enrollment to aid in school stability. Upon enrollment, LNCA's McKinney-Vento liaison will work directly with eligible students and families to identify academic and personal needs and coordinate resources accordingly.

Differentiated Learning

LNCA will provide differentiated learning support through assistive technology tools and a tiered system of instruction based on Universal Design for Learning principles (UDL). Assistive technology will be fluidly integrated into daily lessons based on student needs. Through a tiered system of instruction (MTSS), teachers will implement strategies based on UDL and work proactively to design lessons to meet all learner needs through differentiated strategies.

K12's product development team strives to align with the WCAG 2.0 Level AA and has begun the process of working towards WCAG 2.1 Level AA. By doing this, the curriculum, communication, and resources provide an accessible platform that is compatible with accessibility, Application Programming Interfaces, language translation programs, and 3rd party assistive technology resources. This platform meets the accessible education media needs of users in accordance with the National Instructional Materials Accessibility Standard (NIMAS). Any K12 resources that may result in user challenges due to a disability may be reported for investigation and remediation, as appropriate, via www.k12.com/accessibility.

Through the use of the K12 curriculum, LNCA will have access to a unique approach to educating all students by having the flexibility to provide large group instruction, small group instruction, pre-teaching and re-teaching concepts based on student data, one-on-one tutoring sessions, and through targeted interventions and supports.

Within the K12 online learning platform, lessons are created with multiple learning styles in mind. Content is rich with visual, auditory, and other student learning supports and the curriculum is able to customize student experiences by using adaptive learning pathways based on student diagnostic assessment data. All lessons provide opportunities for students to engage in remediation or accelerated activities, based on the student's performance data.

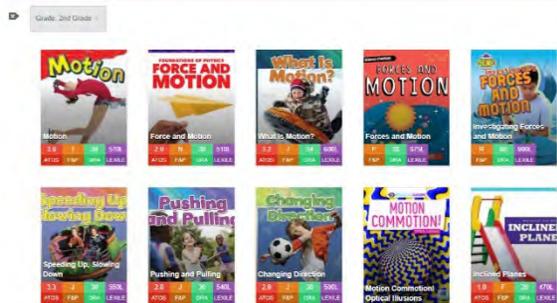

Attachment 30 - ACAD

All LNCA teachers and students/parents will have access to resources to differentiate learning for all students including:

Big Universe: allows teachers to assign books to students according to their ability/Lexile level of reading. Search functions include ability levels, content, genre, interest, etc.

The example below shows the ability of the teacher to assign reading that is based on the content the class is studying, in this case Motion, and make the reading accessible to the student.

Parents and students are also able to search and access books of interest.

Learning Hub: this gives teachers the ability to search for additional supplemental activities and lessons that can integrate into the curriculum to provide differentiation and remediation for students. Teachers are able to integrate ability-level lessons and/or assessments based on students' abilities, whether their needs are lower than their peers or more advanced than their peers. Teachers also have the ability to add cross-curricular assignments for students to make connections within the content. An example of the differentiation capabilities with this tool is the ability for teachers to insert links, equation builders, tables, audio, and video into the content to increase student learning.

Lexile and Quantile Hub: provides teachers with access to books on student ability level that is in the content the class is studying; word lists for specific content areas according to Lexile range; and most frequent use of words. This resource also allows teachers to search content by student quantile range in math and assign supplemental resources according to the student's ability. Parents also have access to the Lexile and Quantile Hub to support their student's learning. **Assistive Technology (AT).**

Due to the unique online nature of the K12 curriculum, many assistive technology tools can be accessed by all students based on their individual needs. With the support of the K12 Assistive Technology Resource Library, all staff members will have recommended tools and strategies at their disposal upon identification of student needs. A sampling of differentiation support tools includes but is not limited to, text-to-speech software, speech-to-text software, lowering readability of grade-level text while maintaining grade-level standards, translation tools, highlighting tools, zoom text, visual dictionary, word prediction software, and visual graphs and web support.

Attachment 30 - ACAD

LNCA staff can request AT equipment through K12 based on students' needs, which will be tracked in the student information database (Total View School) and sent directly to the student. The teacher/parent will be provided with any training needed to support the student in the use of the AT. Specific examples include:

- Document Camera
- External Keyboard (Ergonomic)
- External Keyboard (Standard)
- External Microphone
- External Mouse (Ergonomic)
- External Speakers
- Large Screen External Monitor
- Large Screen Laptop
- Noise Canceling Headphone
- Standard Desktop Computer
- Touchscreen External Monitor
- Touchscreen Laptop

Accommodations

In addition to the team approach to serving students identified with disabilities, EL, 504, or other educational need, there may be necessary accommodations that will ensure that students have access to the grade-level curriculum and their educational environment. Accommodations are provided in order to allow access, not to lower or reduce learning expectations. The following table provides examples of guiding questions or needs and sample accommodations that may be considered to address those needs. The chart does not contain an exhaustive list; accommodations should be evaluated on an individual basis.

31. Describe how your school will demonstrate and assess student performance aligned to the school mission and vision for the school year

LNCA's mission is "to provide a world class, adaptive, synchronous and asynchronous virtual learning environment to meet the needs and interests of students across Hawai'i wherever they are academically, physically, socially, and/or culturally and to prepare them for success in their chosen college or career path, in alignment with their individual kuleana" and our vision is "to create a charter school that continuously paves new pathways for virtual education, leveraging technology and innovative teaching methods to advance education for all student populations."

The Academic Performance Framework, adopted by the Commission, identifies a number of standardized assessments used to measure the School's academic performance. Beyond those, LNCA will utilize additional measures aligned to the School's mission and vision to assess student performance throughout the school year. Those measures will be used to inform school leaders, teachers, staff and the governing board in their ongoing student-focused instructional planning and cycle of continuous improvement.

LNCA's vision focuses on improving outcomes for underperforming, underserved, and English learners, as well as providing Hawai'i's students with access to personalized learning and real-world experiences that prepare them for success in career, college, and beyond. LNCA will support students in demonstrating academic growth and proficiency through assessment, engagement in career explorations and learning with hands on work-based learning experiences, earned industry certifications, and successful high school graduation. To accomplish this, we will continuously assess student performance and use that data to inform instruction aligned to our mission and vision.

Growth Measure Assessments. A Normed-Referenced Growth Measure, such as STAR 360, will be administered in reading and math to measure a student's academic growth over time, which aligns with the School's mission and vision. These assessments are administered to students three times a year; beginning, middle and end of year. The initial assessments take place before the beginning of the school year or upon enrollment approval. The initial assessments are administered to help to identify strengths and weaknesses in meeting state standards for each student. These assessments offer an initial benchmark for student skill level which allows teachers to differentiate instruction based on student needs. Assessment results will provide data to be used as an indicator of how to group students for each instructional cycle. Teachers will differentiate instruction based on individual student needs while they assess students' mastery of the state standards. Beyond whole group instruction, students needing additional support will attend targeted small group instruction sessions with their teacher for reteaching and more personalized instruction tailored to their individualized needs. Additionally, students below benchmark in reading and math will be provided with additional remediation support, such as enrollment in a remediation tool.

Formative Interim Assessments. Formative interim assessments will be given at the end of each instructional cycle for English Language Arts, math, and any other courses tested by the state. This data will then be collected and analyzed to determine standards mastery as well as the best intervention/ teaching strategies to employ. Formative interims will be administered to

Attachment 31 - ACAD

all students and aligned to the state assessment blueprint, state standards, and curriculum. Assessments will test student mastery of material taught in the preceding instructional cycle(s).

Course Assessments. Content-specific assessments are built into every lesson and unit of the proposed curriculum providers courses to guide and tailor the pace of progress to each student's needs. Lesson assessments are used to verify mastery of the objectives for that lesson, and to determine whether a review of some or the entire lesson is advisable. When content is presented using platforms that support adaptivity, lesson assessments can also determine the learner path, i.e., the sequence of learning objects that make up a particular student's journey through a lesson. Unit assessments show whether the student has retained key learning objectives for the unit and identify specific objectives students may need to review before moving on. Semester assessments verify student mastery of key learning objectives for the course.

Graduation Plans. One of the culminating successes of our program will be the number of high school graduates and their transition into their next step, whether it be career, college, or enlistment in a military branch. Every student will have the opportunity to indicate their post high school goals. Counselors, in coordination with students, will utilize student specified intentions to develop their high school graduation plan designed to meet their individual goals. Students who understand and take ownership of their graduation plan are more likely to stay enrolled and complete their course of study. Towards that end, LNCA will monitor and measure student interaction and progression with their graduation plan.

Career Readiness. Aligned to our mission and vision, LNCA strives to provide students with personalized learning and real-world experiences to ensure they graduate equipped with the tools they need to move directly into their chosen career or continued education. LNCA teachers and administrators will measure student progress towards career goals through a regular cadence of data review which will include course passing rates, engagement in Project Based Learning, career pathway progression and completion, participation in work-based learning experiences, industry certifications earned, and dual credits earned. Our Counselors will proactively plan with students to ensure these opportunities are available to them. They will also closely monitor these data points to provide student support, as needed, to help students stay on track towards graduating with these achieved. Teachers and administrators will review data and collaborate to support individual student needs as well as identify trends across career pathways, courses, and certifications to inform improvement strategies. Struggling students will be provided with additional support.

Utilizing a combination of the aforementioned assessments and following the spiral of inquiry model, teachers will participate in regular data meetings with LNCA administrative leaders. These meetings will encompass data review by program, grade level and subject area. Teachers will collaborate, noting observations on student performance, discussing possible reasons for low performance in those areas, selecting focus areas for improvement, identifying teacher needs to increase student performance, creating action plans, and reviewing previous cycles of data, action, and outcomes for continued improvement. Teachers will use anecdotal data from interactions with students in addition to grades earned on assessments to personalize

instruction in both whole group and small group sessions, as well as in supplemental learning activities in the online school. School leaders will also participate in monthly data review meetings, following the same process, to discuss the student population as a whole and drill down into student demographics. The LNCA Board will be informed of identified trends and plans for improvement during academic reports to the Board.

Through the use of assessments, progress monitoring, data analysis, and strong connections with students, the effectiveness of the LNCA educational program can be monitored in real time. The ability to identify approaches that are being highly impactful, and those that are not, empowers school leaders and teachers to immediately adjust instructional practices to better meet student needs. This approach aligns with LNCA's mission and vision and facilitates instructional planning directly aligned to the school culture, which will be one of continuous improvement.

32. Describe your proposed school's professional development plan to onboard faculty and staff that:
- a. Aligns to your mission specific instructional methodology; and informs instructional practices; and
 - b. Addresses specific professional development plans related to teaching struggling students, as well as SWD and ELs, including:
 - i. Professional development for all staff on the proposed school's special education and EL service delivery model;
 - ii. Strategies for modifying curriculum and instruction to accommodate student needs;
 - iii. The legal requirements of disciplining SWD;
 - iv. Teacher responsibility to address IEP goals, accommodations, and modifications; and
 - v. Continuing training to ensure teachers and staff are informed of most recent changes in special education policy, regulations, and best practices.

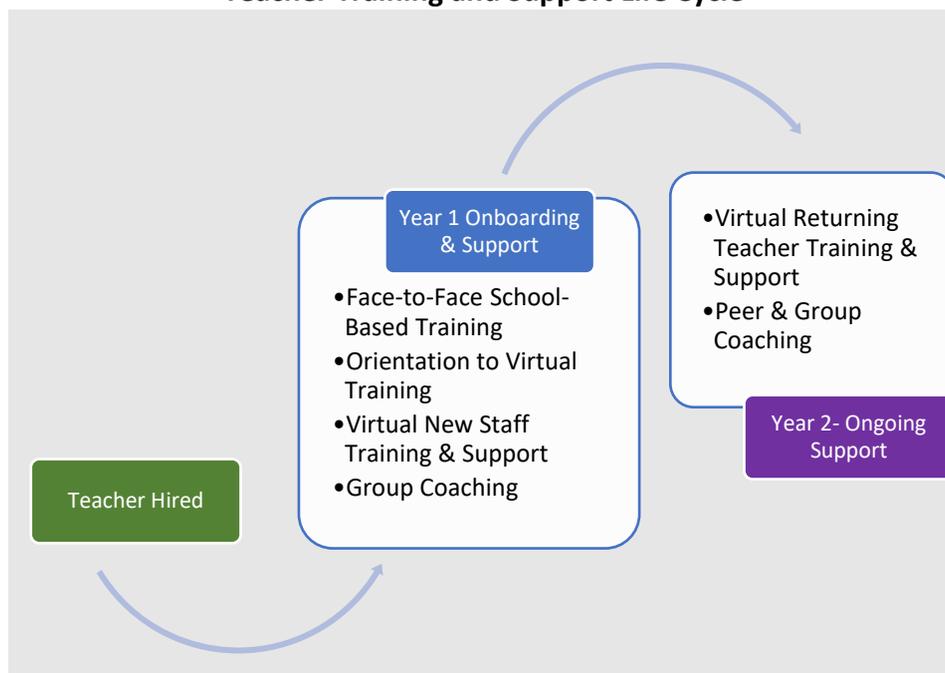

LNCA Teacher Professional Development Plan

Professional development will be a joint effort between the LNCA governing board and K12. The Board will provide professional development based on the School's mission, vision, culture, student data analysis, the Board's academic plan, curriculum map, assessment calendar, and state required annual professional development for all teachers and other staff. Professional development will be a year-long pursuit focused on providing teachers with the skills and competencies required to meet the needs of students and their families including data-driven instruction, instructional practices, and instructional leadership. Each teacher will have an Individual Development Plan that is a combination of required professional development as deemed appropriate by their tenure or as identified by an administrator as an area where development is needed and other optional offerings particular to their areas of interest. LNCA's school-based professional development program will address the needs of experienced as well as new teachers and administrators.

K12 will provide a robust professional development program as it pertains to virtual learning and associated best practices. Since 2017, K12 has partnered with **Southern New Hampshire University (SNHU)** to develop competency-based learning modules, specializations, and a Master of Education (M.Ed.) in Online Instruction degree and six related specializations (see below).

During a teacher's first year, K12 will provide a year-long induction program, giving teachers the tools needed for each stage of development throughout the school year. This includes training in both synchronous and asynchronous teaching models, as well as a focus on targeted instruction. New teachers are partnered with a mentor for ongoing collaboration and partnership. Additionally, teachers will have the opportunity to participate in national, regional, and school level professional development opportunities.

New Teacher/Staff Onboarding (NTO)¹

Goal: To provide training for teachers new to virtual teaching in elementary, middle school, and high school grades.

New teachers hired at the school will be licensed teachers and generally highly experienced. The NTO Program introduces teachers and some staff to the School's model, curriculum, systems, communication, instruction, and community through customizable paths, using synchronous and asynchronous learning. NTO is intended to complement school-specific, school-delivered start-up training for new staff.

This training includes basics for online instruction and teachers' access to competency-based Professional Learning Modules. The synchronous and asynchronous time is also used for teachers to work from their home environments, practicing skills they learn during the training and familiarizing themselves with the tools of the Learning Management Systems such as lesson planning and tracking student progress. At the end of NTO, all new teachers will continue to receive support from the Portfolio Support Team through customized professional development (as requested by School leaders), live professional development modules, informal observations, and offline support through an internal platform.

K12 Mentor Training Program

LNCA will participate in the school-based Mentor Training Program, which offers live support to new teachers from experienced teachers, the "mentors." The mentors have access to live and asynchronous training throughout the year to connect mentors across the nation to discuss

best practices with the aim to produce mentors that build strong relationships and move beyond “how to” conversations to those that focus on academic results. LNCA will assign a point of contact to run the mentor program. Mentors will also be provided for counselors and other school personnel.

Competency-Based Professional Learning Modules (New and Returning Staff Members)

K12 has worked with SNHU to conduct a research project about the efficacy of online professional development for instructors. It was concluded that competency-based learning was most effective when training staff online. The training modules have been developed to reflect the competency-based approach for online professional development.

The following competency based Professional Learning Modules (PLMs) are available for all LNCA teachers and leaders in K12 Training.

- SNHU-Created PLMs
 - Building and Maintaining Learning Coach Relationships
 - Using Data to Differentiate Instruction
- K12 Created PLMs
 - Creating an Engaging Learning Culture
 - Planning Intentional Instruction
 - Intentional Instruction I
 - Math Collaborative Problem-Solving
 - Culturally Responsive Teaching
 - Targeted Instruction Level 1
 - Targeted Instruction Level 2
 - Trauma Informed Schools Reading Foundations Pathway (in development)— a 5 course series
 - Math Foundations Pathway (in development)— a 6 course series
 - Modules Exclusively for Leaders:
 - Strategies for Leadership
 - Core Practices of Instructional Leadership
 - Growth Mindset Series (3 modules that cover Basics, a Growth Mindset for Leaders, and How to Implement in the School)
 - Finding the Time and Priority Management
 - Cultural Levers for School
 - Leadership Precision Series (3 modules that focus on Instructional Planning, Observation & Feedback, and Professional Development)
 - Rigor for School Leaders
 - Data and Leadership (in development)
 - School Needs Assessments (in development)

Special Programs Professional Development

LNCA will have a year-long professional development plan outlined prior to the teaching staff's first day with the school. It is important that all staff, including special program teaching staff,

Attachment 32 - ACAD

are aligned with the mission and vision of the school. All special program staff will be included in professional development and training provided to general education teachers. Including, but not limited to, professional development focused on: instruction, school systems, building relationships, social/emotional learning, and support, the multi-tiered system of support, interventions, and overall school expectations. Professional development will be provided both synchronously and asynchronously. At the beginning of the year, prior to the students' first day of school, staff will have a multi-day outlined training. Within that professional development, special programs and meeting the differing needs of the student population will be a focus. Live professional development will include:

- **Child Find processes: indicators**, whom to contact, and how for all areas of special programs.
- **Multi-Tiered System of Support:** identification, data, instruction/interventions, schedule, and processes
- **Special programs:** service delivery model for SWD, EL, 504, advanced/gifted, differentiation, online platform tools, accommodations, the GE teacher's role, plans (IEP, 504, EL, ALP), and how to meet the needs identified within the plan
- **Curriculum:** accommodations, modifications
- **Discipline:** school discipline policies, procedures for students in special programs (manifestation of determination processes), communication and collaboration
- **Collaboration:** collaboration expectations for GE and special program teachers, Professional Learning Communities
- **Data:** data-driven instruction, a review of data available to teachers, how to make instructional decisions based on data
- **FERPA: Meeting** FERPA guidelines in keeping student information safe and through communications.

LNCA believes that continued professional development is essential to ensure that staff maintains a common vision for the school and that teachers continue to meet the needs of the student population through quality instruction. Quality instruction for all student needs, crossing the multi-levels of student needs and support (MTSS, special programs, at risk) will be a continued focus throughout the school year. Staff meetings will be held weekly and special programs content will be integrated into meetings on a monthly basis. The content will be determined by the clearly outlined professional development plan created for the school year as well as school, student, and teacher needs are identified.

Special Programs staff will also have weekly staff meetings to focus specifically on compliance processes, any changes in policies, regulations, or best practices, and team building. Content will include, but is not limited to:

- **Compliant IEP, EL, 504, and ALP documents and processes:** each special program teacher will be trained specifically on the processes and procedures for compliance documents, meetings, and implementation.
- **Progress monitoring of goals within plans:** timelines and processes
- **Accommodations and modifications**
- **Assistive technology**
- **Differentiation**

Attachment 32 - ACAD

- **Services and instructional strategies**

Professional development will be provided in live training sessions provided by the LNCA Board and leadership team, in combination with recorded training modules through the K12 online training portal. Completion of modules and attendance at professional development will be tracked to ensure that all staff have the required professional development. K12 online modules will include:

- Welcome to Newrow 2.0 and Newrow Knowledge Base
- Total View Schools
- Online platforms for student curriculum (OLS and OMHS)
- Suicide Awareness
- Mandatory Reporting of Child Abuse and Neglect
- Accessibility Requirements for teachers
- FERPA in the online world and email guidance
- Accommodations and Modifications in the virtual environment

Section 504:

- Starting strong with Section 504

Special Education:

- Special education in the virtual world
- IEP progress monitoring
- SMART IEP goals
